Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to Amendment*

This action is in response to Applicant's amendment filed September 27, 2006. Claims 1-21 are pending in the application.

### *Election/Restrictions*

Restriction to one of the following invention is required under 35 U.S.C 121:

A. Claims 1-8 and 16-18 are drawn to a method for receiving a program by a user location that is sent from a content provider, classified in **class 709, subclass 231**.

B. Claims 9-15 and 9-21 are drawn to a method for receiving a program by a user location that is sent from a content provider, classified in **class 709, subclass 231**.

Although the inventions fall in the same subclass, they are distinct from each other for the following reasons: Inventions A and B are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP 806.05(j).

In the instant case, within invention A, the method comprises the steps of recording at least second segment of each of a second plurality of programs sent from the content provider if the user request is NOT detected before a stagger period expires; and recording the one of the

first plurality of programs if the user request is detected before the stagger period expires. On the contrary, within invention B, the method comprises the steps of: recording a second segment of the program if the user request is detected before the period expires; and discontinuing the recording of the first segment if the user request is not detected before a period expires.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP section 808.02), restriction for examination purposes as indicated is proper.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alina N. Boutah whose telephone number is 571-272-3908. The examiner can normally be reached on Monday-Friday (9:00 am - 5:00 pm).
